### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: None of the prior art references of record, singly or combined, teaches or suggests a resin composition comprising a laminated film comprising a first synthetic resin and metal layer wherein both sides of the metal layer are covered by films of a second synthetic resin and wherein the first synthetic resin has a melting point ("MP") and a softening point ("SP") lower than those of the second synthetic resin. The closest reference is the US patent No. 7,250,453 to Sakuma et al which teaches a resin composition comprising a composite particle and a basic material resin which disperses the composite particle wherein the composite particle comprises a polymer base resin and fine particles of calcium phosphate compound having an antibacterial metal (namely silver) carried thereon. However, the softening point of the basic material resin (the first synthetic resin) is higher than that of the polymer base resin (the second synthetic resin) of the composite particle. Thus, Sakuma teaches away from the claimed invention. Moreover, the composite particle taught by Sakuma does not form a coated particle form or laminated film of resin/metal/resin as required by the instant claims. None of the JP 49-41436, WO 01/83880 and US 2004/0224586 teaches the presence of two synthetic resins in a composition and their softening point or melting point relationships. Relationship.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
